Title:	HIA and Other Resources to Advance Health-Informed Decisions
Document Last Updated in Database:	June 30, 2021

Abstract

PEW developed a toolkit of strategies that local governments are implementing to make better health-conscious decisions. Planners and developers can search by type of strategy, geographically, research method, and more. By having this website, local leaders can view a consistently updated health toolkit packed with different strategies that local governments around the country are doing to make more health-conscious decisions when it comes to housing, education, and planning.

HIAs and Other Resources to Advance Health-Informed Decisions

A toolkit to promote healthier communities through cross-sector collaboration

DATA

April 29, 2018

Topics: [Fiscal & Economic Policy](#), [Infrastructure](#), [U.S. State Policy](#) & [U.S. Policy](#)

VISUALIZATION

Projects: [Health Impact](#) Tags: [Local policy](#) & [Children's health](#)

The toolkit was last updated on June 30, 2021.

The Health Impact Project's cross-sector toolkit for health contains resources that help communities, agencies, and other organizations take action to improve public health. The toolkit offers a collection of health impact assessments, guides, and other research to support policymakers' efforts to consider health when making decisions across sectors, such as housing, planning, and education. To suggest new resources, please complete this [form](#) and submit it to healthimpactproject@pewtrusts.org. [Frequently asked questions and more information](#) about the toolkit is also available on Pew's website.
